

The City of
WORCESTER

Launch Guide Pilot Program

How does it work?

Users set their smartphone in the cradle of the Launch Guide with the screen facing the user. The QR code directs the device to a website with embedded data that enables the phone to read the information by voice or show text.

For more information please contact
The City of Worcester Office of
Human Rights and Disabilities at
(508) 799-1995

What is it?

These are part of a new collaborative pilot program featuring 12 Launch Guides that have been installed around the perimeter of City Hall and the Worcester Common. These programs provide navigational direction around the Worcester Common and an accessible path of travel inside City Hall and are meant to assist persons with visual impairments, deaf and hard of hearing individuals and others with certain cognitive disabilities.
