

Re-Designing Endicott & Bigelow Streets

Your Streets Designed for All Users

Community Meeting #4

Monday, January 6, 2025, 6 pm WRTA Community Room

Introductions - City Interdepartmental Project Team

- John Odell, Chief
- Department of Sustainability & Resilience

- Gregory J. Baker, Director
- NeighborhoodDevelopmentDivision

- Stephen S. Rolle, P.E. Commissioner
- Department of Transportation and Mobility

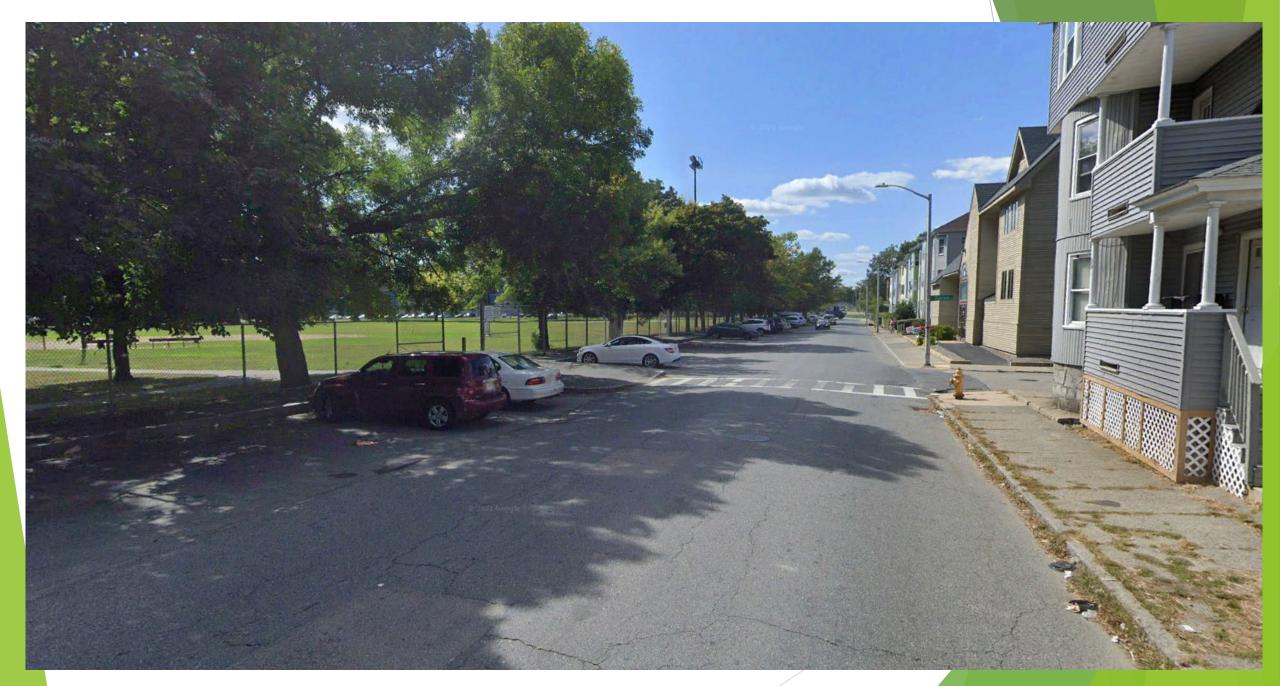

Agenda

- 1. Project Summary
- 2. Why Green Island Neighborhood?
- 3. Sustainability and Resilience
- 4. Project Status
- 5. Comments and Questions

Project Summary

Before

After

The need for improving Endicott & Bigelow Streets

Infrastructure:

- Poor pavement and sidewalk conditions
- Deteriorated, narrow sidewalks that are not ADA compliant
- Vegetation and signage obstructions in sidewalks
- Relatively wide street (Endicott) with no traffic calming
- Lack of accommodations for bikes and micro-mobility users
- Deteriorated and limited crosswalk painting

Safety:

- Need to safely provide access for residents, park users, and other trips using the corridor
- Averages about 4 crashes per year (excluding Quinsigamond Ave and Harding St intersections)
 - Crash rate are 4 times the state average for urban local streets
 - 70% + of crashes related to parking maneuvers
 - 28% involved injuries
 - 3 crashes since 2016 have involved cyclists

Project Summary

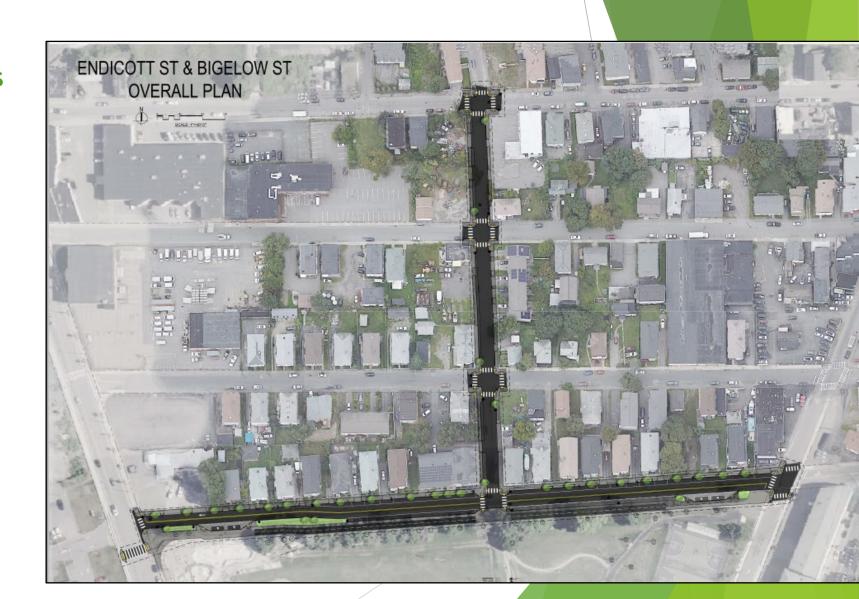

- Wider sidewalks on both sides of Endicott Street
- Separate bike path adjacent to sidewalk along Crompton Park
- ADA Compliant
- Improved / safer pedestrian crossings
- Traffic calming bump outs and tabled intersection to reduce speeding

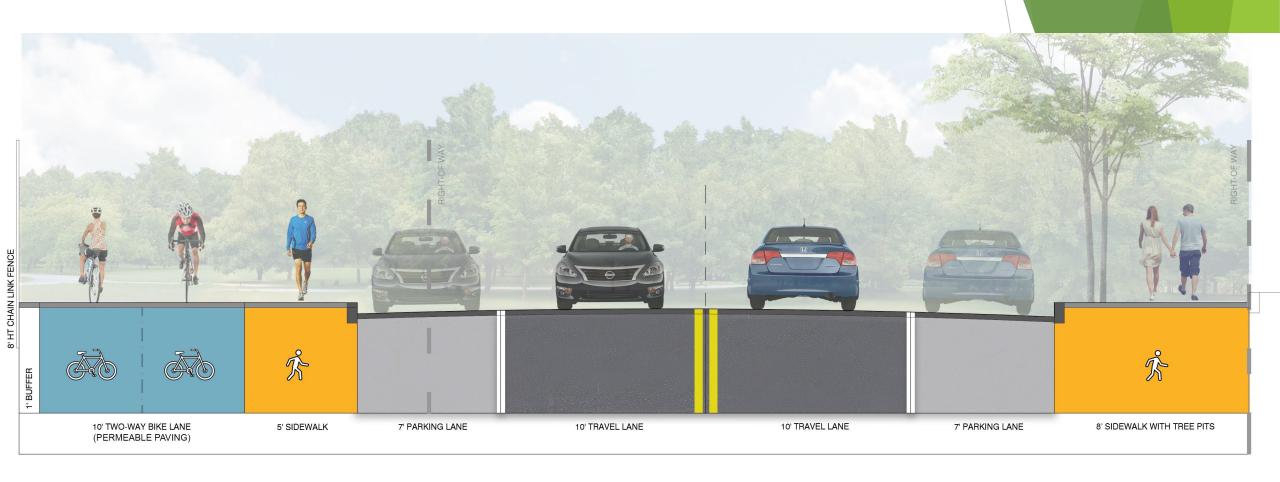

Project Summary

- 124 on-street parking spaces bordering Crompton Park
 - 133 spaces currently
 - Parking on Endicott decreases from 78 to 51 spaces
- Net increase of 23 trees

 A variety of species (all native) including Common
 Hackberry, Kentucky
 Coffeetree, Tupelo,
 American Hophornbeam and
 American Hornbeam.

Complete Streets Re-Design

Complete Streets Re-Design

Why Green Island Neighborhood?

- Correcting historic disinvestments
- Improve infrastructure
- Bring neighborhood improvements with multiple co-benefits
- Improve resilience to extreme summer heat and flooding caused by intense rain events (trees & green infrastructure)
- Provide safer accommodations for all street and park users walkers, bikers, wheelchair users, drivers, etc.
- 2019 \$3 Million Commitment to Invest and Improve the GI
 Neighborhood during Former City Manager Augustus' Administration
- Special opportunity for this neighborhood to bring more "Green into Green Island"
- Primary Source of Funds: CDBG (Community Development Block Grant)

Summary of CDBG Investments in the Neighborhood

2019

\$3 Million Commitment to Green Island Neighborhood Improvement 2021

10 Scott St/ 169 Washington Rehab, 3 Units 155 Millbury St. Lead Abatement, 2 Units Road Resurfacing and Sidewalk Reconstruction for Lodi & Lamartine Streets 2023

4 Mead St. Rehab, 3 Units 17 Lodi St. Rehab, 1 Unit Design plans for Resurfacing Endicott & Bigelow Streets

10 Sigel St. Lead Abatement, 3 Units

2022

22 Sigel St Rehab, 1 Unit 40 Ellsworth St. Rehab, 3 Units Pernet Food Choice Pantry Renovation

2024

Service Provider Commitments

- Green Island Neighborhood Center
- Pernet Family Health Services

Sustainability and Resilience

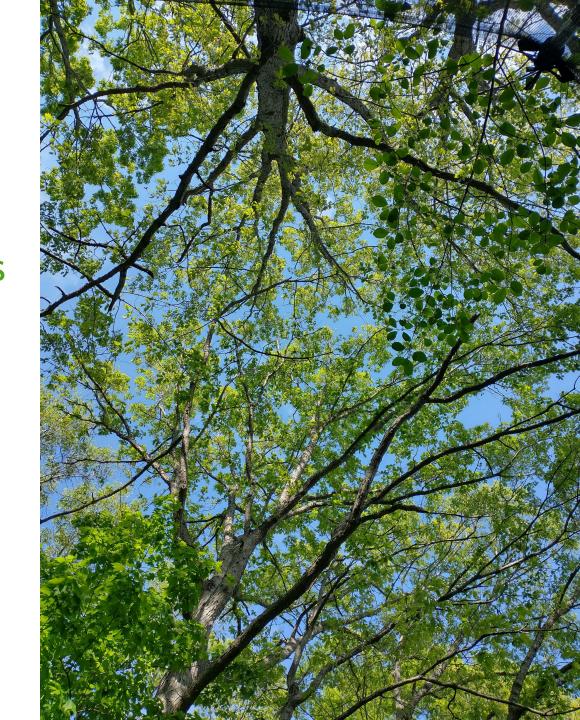

The Green Worcester Plan

Goals

- Climate Change Resilience
- Sustainable Transportation Choices
- Integrated Water Management

Street Trees

- Reduce flooding
- Reduce heat
- Improve air quality
- Aesthetics

Project Status

- Environmental Review and Final Design
- Funding
- Bidding, Bid Award & Anticipated Construction Start Date
- Pre-Construction Meeting with the construction project team (phasing, point of contact)

Comments and Questions
