

Building Resilience with Edible Plants

Grow Delicious Food and Support a Healthy Ecosystem

Welcome!

As many of you know, our climate is changing, and more and more people are interested in building resilience into their lives.

As "foodscapers" Reimagined Roots creates beautiful landscapes full of food, medicine, and native plants, building resilience in your backyard.

Nathan Fournier
Owner, Reimagined Roots

Conclusion

Edible shrubs offer beauty, bounty, and a path to a more resilient future. Let's grow a healthier landscape, one delicious shrub at a time.

Native Nutritional Powerhouses

A Pollinator Haven, A Vision for Abundance

A Changing Climate & Resilient Landscapes

Our changing climate brings challenges, but also a great opportunity to build resilience into our landscapes.

Foodscaping with Shrubs

- Foodscaping creates beautiful landscapes with edible plants. Shrubs are important for sustainability because they are hardy and long-lived.
- Benefits:
 - Beautiful
 - Sustainable
 - Low-maintenance
 - Long-lived
 - Support local ecosystems
 - Provide food
 - Reduce water usage
 - Support local economy

Building a Resilient and Sustainable Landscape

Native shrubs are perfectly adapted to our climate, reducing water usage and helping plants thrive longer, thus creating a more sustainable landscape.
